

CERTIFICATE OF INTERNSHIP

PRESENTED TO

SHRUTI SACHIN NIKAM

has successfully achieved the Internship Credential by completing a 10-week program in the domain of

Data Structures and Algorithms in C

During the internship, the learner demonstrated proficiency in:

- Course Kick-off and C Refresher for DS & Algorithmic Thinking and Complexity Analysis
- Linear Data Structures - Arrays and Linked Lists & Stack and Queue: LIFO and FIFO Implementations
- Recursion and Its Role in Data Structures & Tree Data Structures: Concepts and Binary Trees
- Binary Search Trees (BSTs): Efficient Searching & Heaps and Priority Queues: Efficient Max/Min Retrieval
- Hashing and Hash Tables: Fast Data Retrieval & Graph Data Structures: Representation and Traversal
- Sorting Algorithms: Efficiency and Comparison & Searching Algorithms: Linear and Binary Search
- Introduction to C++ for Data Structures (Optional Tool) & Advanced Data Structures: Tries and AVL Trees (Conceptual) & Algorithmic Paradigms: Divide and Conquer, Greedy
- Best Practices and Performance Optimization & Capstone Project: Building a Real-Time Event Scheduler
- **Project: Student Grade Book Manager**

This certification recognizes the successful completion of the internship requirements and project work.

Issued on: Mar 23, 2026

Certificate ID: 2026-64FD36DA97
